### HOW RISKY IS IT?

The value of the fund could go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility."

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Labour-Sponsored Venture Capital Corporations have higher than average liquidity risk. Liquidity risk refers to how difficult or costly it may be to divest of an investment held by the Fund. Rules applicable to mutual funds directed at ensuring liquidity do not apply. There are restrictions on the transfer and redemption of shares including a risk that a redemption request may be declined by the fund. Coupled with volatility risk, liquidity risk increases the overall risk profile of the fund. Redemption of shares prior to the fund's government-mandated eight year maturity period having elapsed will trigger tax credit repayments.

### NO GUARANTEES

Like most mutual funds, this fund doesn't have any guarantees. You may not get back the amount of money you invest.
